DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

A. Glycosyl Donors (as recited in claim 7):

1. GalNac
2. Bgal(1-3) alpha Gal NAC
3. Sialyl

B. Platform:

1. Peptide (either L or D amino acids)
2. Peptidomimetic
3. Tandem repeats
4. Hybrid platform
5. Linear
6. Cyclic
7. Fluorescent labeled or UV as recited in claim 25
8. Lipid containing platform

C. Glycosylation Sites

1. Natural as recited in claim 20
2. Unnatural

Art Unit: 1639

3. Blocked or unblocked. If blocked, the specific blocking compound e.g., acetyl as recited at claim 6 or claim 19, if OH containing.

Each of the species included in each of groups A-C differs in structures and effects. Each of these species requires different patentability determination under the different statutes. A prior art reference anticipating one species in each group e.g., Group A will not render obvious the other species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37

Art Unit: 1639

CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Stephen Reed on 6/26/03 and 7/2/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must

be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
